Food Processing Lab

Experiments List

SL. No.	Experiment Name
1.	Introduction of different types of machineries which are used in Food Industries.
2.	Preparation of multi flavors or high notorious Papaya Candy.
3.	Preparation of Ginger Candy.
4.	Determination of Brix of Mango Juice
5.	Preparation of Pineapple Candy
6.	Determination of Viscosity of Supplied Juice sample
7.	Introduction of different types of food machineries for a baking industry
8.	Identification of Raw materials used in baking
9.	Spread test, function of Raw materials
10.	Determination of gluten in flour
11.	Preparation of mixing of batter/dough
12.	Preparation of Bread
13.	Preparation of soft cake
15.	Preparation of Chocolate Cake
16.	Preparation of Biscuits
17.	Preparation of Ghee from Milk Cream
18.	Preparation of Yoghurt
19.	Preparation of Ice-Cream by Home freezer
20.	Preparation Cheese
21.	Preservation of Cucumber by Pickling
22.	Tomato preservation by home canning methods
23.	Preparation of Sweet & Crispy Beet Chips
24.	Preservation of Cauliflower by drying methods
25.	Preparation of Banana root chips
26.	Preparation of Jackfruit Chips.
27.	Preparation of Bitter gourd chips.
28.	Preparation of pineapple jam.
29.	Preparation of Potato Chips.

30.	Preparation of Deep fried banana chips.
31.	Preparation of Amra Jam and Jelly
32.	Preservation of Potatao by balancing (heat/Stem) method
33.	Processing of Moringa leafs for moringa tea
34.	Preservation of Green Coconut (Commercial Process)
